

**Course of the exam of
Pathobiochemistry 2-Molecular Oncology
In the winter semester 2023/24**

All dates for the exams from the course Pathobiochemistry 2 - Molecular Oncology (B02432) have been published in SIS. The number of dates is final and according to the faculty rules we are announcing more than 170% of the dates. Registration for pre-terms and regular terms will be open from 20 November 2023, the time will be given in SIS.

The exams will be held at the Department of Biochemistry and Experimental Oncology, U Hospital 5, 2nd floor.

The exam is oral and the questions are published on the Institute's website.

A student can take the exam only if he/she is registered for the date in SIS and if he/she has fulfilled all the requisites for the exam.

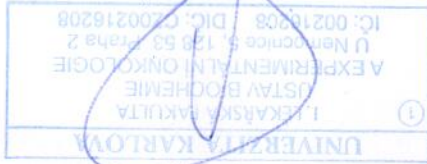

The deadline for enlisting for a particular exam term is 2 days before the exam.

Cancellations will be possible up to 3 days before the exam.

A student who fails to appear for the exam and does not properly excuse himself/herself in advance will not be graded, but the exam date will be forfeited. After the forfeiture, the student may register for the next exam date. The student must excuse himself/herself in writing with an explanation and justification.

A student has the right to take the exam a maximum of three times, i.e. he/she is entitled to 2 make-up dates, no extraordinary make-up dates are allowed. However, if the student does not exhaust these possibilities within the announced dates, this does not entitle the student to a special examination date. No further examination dates will be announced.

For matters of student administration, contact As. Mgr. Lucie Stollinová Šromová Ph.D.

Prof. MUDr. Aleksi Šedo, Dr.Sc.
Head of the institute

18th of the November 2023
